

MUHAMMADHU INAAM

Mechatronics Engineer — Automation & Controls

Beruwala, Kalutara, Sri Lanka | +94 77 089 6608 | mohamedinnam787@gmail.com | linkedin.com/in/muhammadhu-inaam

PROFILE

Mechatronics Engineer with 2+ years of hands-on experience across PLC/HMI/SCADA automation, embedded systems and CNC/industrial process control, backed by a BEng (Hons) in Mechatronics. Track record of taking automation and control projects from design through to working hardware, including a from-scratch CNC laser cutter build and an IoT-enabled motor controller. Seeking a junior-to-mid-level Automation / Mechatronics / Controls Engineer role internationally; currently building German language skills (A1) alongside the job search.

TECHNICAL SKILLS

Automation & Controls: PLC / HMI / SCADA programming & troubleshooting, industrial automation, process control, power electronics & motor control

Programming & Embedded: C, C++, Python; microcontroller platforms and embedded systems; circuit design, PCB layout, electronics debugging

Design & Manufacturing: SolidWorks & general CAD, 3D printing & additive manufacturing, CNC systems

Project & Supply Chain: Project management (Primavera P6), supplier sourcing, supply chain management

WORK EXPERIENCE

Mechatronics Engineer

Skipod Manufacturer Pvt Ltd (US-based company) - Sep 2025 to Jul 2026

- Designed and built the "Skimulator," an interactive simulation system, from concept through working hardware
- Built an industrial CNC laser cutter from scratch, integrating mechanical structure with electronics and control systems
- Redesigned the original Skimulator into a more compact production version, cutting footprint while retaining full functionality
- Integrated and tested simulation software within the Skimulator hardware environment
- Managed supplier sourcing from initial concept through to production parts

Assistant Mechatronics Engineer

AXEL Industries Pvt Ltd, Sri Lanka - May 2024 to Jul 2025

- Operated and troubleshot PLC, HMI and SCADA systems supporting automation and process control lines
- Designed, developed and tested mechatronic systems for industrial applications
- Collaborated with cross-functional engineering teams to improve automation reliability and uptime

KEY PROJECTS

- IoT-Enabled 3-Phase Motor Controller (Final Year Project) - designed a fully electronic motor controller for 1 kW systems with IoT-based real-time monitoring and diagnostics
- Automated Pulse Jet Dust Collector - DSI, Galle - developed a PLC + HMI + SCADA automation system, improving operational efficiency and reducing maintenance requirements

KEY PROJECTS (CONTINUED)

- Traditional Lathe to CNC Conversion - converted a manual lathe into a fully CNC-controlled system
- Industrial CNC Laser Cutter (scratch build) - designed the mechanical structure and integrated electronics and control systems
- 340 kW On-Grid Solar Installation, Rajagiriya - assisted with installation and testing of a three-phase solar system
- Additional builds: moisture harvesting system, Arduino-based automated feeding system, surface texture measurement device, automatic light control system

EDUCATION & CERTIFICATIONS

Bachelor of Engineering Technology (Hons), Mechatronics

University of Sri Jayewardenepura, Sri Lanka - 2022 to 2026

Industrial Automation (PLC) & Electronics (E2) - Certificate Training

Ceylon German Technical Training Institute (CGTTI) - 2024

LANGUAGES

English - Native (C2) | Tamil - Native (C2) | Sinhala - Native (C2) | German - Basic (A1), currently learning
