

MUHAMMADHU INAAM

MECHATRONICS ENGINEER

Beruwala, Kalutara, Sri Lanka | +94 77 089 6608 | mohamedinnam787@gmail.com | LinkedIn: Muhammadhu Inaam

PROFILE SUMMARY

Motivated Mechatronics Engineer with solid knowledge in mechanical, electronic and control systems integration. Completed specialized training in PLC programming and industrial automation at Ceylon German Technical Training Institute. Practical experience in designing IoT-enabled devices, CNC systems, industrial automation projects and 3D modeling. Seeking a junior-to-mid-level Automation / Mechatronics / Controls Engineer role locally to contribute technical skills in an innovative team while gaining advance industry exposure.

TECHNICAL SKILLS & CORE COMPETENCIES

Automation & Process Control: PLC / HMI / SCADA programming & troubleshooting, industrial process control, power electronics & motor control

Embedded Systems & Software: C, C++, Python; microcontroller platforms and embedded systems; circuit design, PCB layout, electronics debugging

CAD, 3D & Machining: SolidWorks & general CAD software, 3D printing & additive manufacturing, CNC systems & lathe conversion

Engineering Management: Project management (Primavera P6), supplier sourcing, supply chain management, cross-functional collaboration

Soft Skills: Problem-solving and Adaptability, Analytical Thinking, Leadership, Teamwork abilities, Communication Skills, Time Management

WORK EXPERIENCE

Mechatronics Engineer

Skipod Manufacturer Pvt Ltd (USA based Company) - Sep 2025 - Jul 2026

- Gained advanced knowledge to design and build a Skimulator interactive simulation system
- Acquired hands-on expertise in building an industrial laser cutter from scratch
- Integrated and tested simulation games within the Skimulator hardware environment
- Redesigned and developed the previous Skimulator into a more compact serial production version
- Managed supplier sourcing from sketch through to finished production parts

Assistant Mechatronics Engineer

AXEL Industries Pvt Ltd (Sri Lanka) - May 2024 - Jul 2025

- Work with PLC, HMI, and SCADA systems for automation and process control
- Design, develop, and test mechatronic systems for industrial applications
- Collaborate with cross-functional teams to enhance automation uptime and reliability

PROJECTS

- IoT-Enabled 3-Phase Motor Controller (Final Year Project) – Designed a fully electronic motor controller for 1 kW systems with IoT-based real-time telemetry and diagnostics
- Automated Pulse Jet Dust Collector – DSI, Galle – Developed PLC + HMI + SCADA based automation system, improving operational efficiency and reducing maintenance

PROJECTS (CONTINUED)

- Traditional Lathe to CNC Conversion – Converted manual lathe into CNC-controlled system
- Industrial CNC Laser Cutter (Scratch Build) – Designed mechanical structure and integrated electronics and control systems
- On-Grid Solar Installation – Rajagiriya (340 kW) – Assisted in installation and testing of three-phase solar system
- Additional Projects: Moisture Harvesting System, Arduino-Based Automated Feeding System, Surface Texture Measurement Device, Automatic Light Control System

EDUCATION & CERTIFICATIONS

Bachelor of Engineering Technology (Hons) in Mechatronics

University of Sri Jayewardenepura, Sri Lanka (2022 - 2026)

Industrial Automation – (Course Code: PLC)

Ceylon German Technical Training Institute (2024)

Electronic – (Course Code: E2)

Ceylon German Technical Training Institute (2024)

LANGUAGES

English: Native proficiency (C2) | Tamil: Native proficiency (C2) | Sinhala: Native proficiency (C2) | German: Basic (A1) – currently learning
